Internships & Projects

- Internship

Machine Learning Using Python -- By Verzeo

Internship program, I have learned about regression, predictive modeling, predictive analytics, data visualization, NumPy, and pandas. I have successfully completed both major and minor projects.

Full Stack Web Development -- By Manac Infotech PVT.LMT

During my internship program, I have acquired valuable skills in web development, including HTML, CSS, Bootstrap, JavaScript, MongoDB, and various front-end framework technologies. As a part of this program, I successfully designed and developed a fully responsive website for Finpal, a mobile application.

The website serves as an online platform for Finpal, providing information and showcasing its features. By implementing my knowledge of HTML, CSS, and Bootstrap, I ensured that the website is visually appealing and compatible with various devices, offering a seamless user experience across different screen sizes.

I invite you to check out the website via the following link [<https://sidd9390.github.io/Website1/>].

- Project

Smart Medicine Reminder for Elderly People Using IOT -- By College

In this project, I am the team leader, and the main objective is to address the issue of elderly individuals experiencing a decline in their brain memory power. Due to this decline, they often struggle to take their medication

at the right time, which poses a health risk. To tackle this problem, we have developed a Smart Pills Reminder device. This device effectively monitors the patient's medication schedule and provides timely reminders. By utilizing this device, your loved ones can maintain a healthier and happier lifestyle.
